## PROFILE

My name is Daimond, I am a competent person in the field of RPL (Softwere Engineering), I can work in a team or individually. I am a hard worker, easy to learn something new, and a person who has the soul of a leader. I have taken the LSP exam (an institution that carries out professional certification activities which obtained a license from the National Professional Certification Agency (BNSP)) in October 2023, and succeeded in getting "competent" status in my exam, also my experience of interning / intership at PT. Temprina Media Graphics (Jawa Pos Group) can be used as considerations to hire me and make me part of the company.

## INTERSHIP / WORK EXPERIENCE

**PT. Temprina Media Grafika (Jawa Pos Group)**

- **PPIC (Production Planning & Inventory Control), January - May, 2023**

1. Calculating and Ascertaining Production Requirements (Stock Opname). Operate and ensure the smooth running of the production process as a whole, including by calculating and ensuring what is needed, fulfil the raw materials and materials needed, so that productions process can run smoothly without any obstacles.
2. Create and allocate Work Orders / Surat Perintah Kerja (SPK). Surat Perintah Kerja (SPK) is an order/instruction given to employees, containing company or agency activities.
3. Create PA (Price Analysis) reports, Production Reports, and other reports required by the company. Reports are all sources of information, Helps understand the process and progress of company production activity, Assist in recap documentation, and Help solve some problems.
